Education

Iowa State University — Ames, Iowa
Bachelor of Science in Software Engineering — Expected Dec 2028
GPA: 3.9/4.0 — President's List | Phi Kappa Phi | Tau Beta Pi

Work Experience

Tractor Zoom — West Des Moines, Iowa
Software Engineering Intern — May 2026 - Present

- Developed full-stack features using TypeScript, React (TSX), Python, SQL, and PostgreSQL across internal business applications.
- Designed data pipelines using AWS services, Databricks, and Python for analytics and reporting
- Led development of analytics tracking within an internal administration platform, integrating backend data sources and embedded dashboards.
- Collaborated with engineers, product stakeholders, and data teams to deliver scalable software solutions and backend integrations.

TruDesign LLC — Urbandale, Iowa
Founder/Lead Developer — May 2025 – Present

- Developed and launched custom websites for businesses, managing the full lifecycle from client consultation to deployment.
- Designed front-end systems integrated with database backends, optimized sites using SEO, designed UI/UX systems, and managed projects while delivering professional digital sites.
- Delivered consulting services for multiple clients, building custom website functionality, plugins, and backend features tailored to business requirements.
- Managed hosting infrastructure, domains, DNS, deployments, and website optimization (SEO, GEO) using platforms such as GoDaddy and Vercel.

Projects

AI Workflow Automation and Prompt Engineering | August 2025

- Built automated pipelines using n8n to scrape business contacts, process data, and trigger client notifications processing 100+ contacts per run
- Integrated LLM tools and prompt engineering techniques aligned with Google Vertex AI credential requirements

CyAI – AI Sidebar for Canvas | Current

- Worked in a team to develop a Google Chrome extension for ISU students featuring an AI-powered sidebar with an integrated chatbot and to-do list for assignment tracking.
- Led UI/UX design and end-to-end extension development including build pipelines
- Implemented web scraping logic to extract assignments, exams, and deadlines for AI-Memory driven academic assistance

Social Connection App with React Native | Fall 2025

- Developed a React Native application for student event discovery and chat-based networking, managing project lifecycle from design to deployment

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C, C#, XML
Development: React, Vite, HTML, CSS, Bootstrap, RESTful APIs
Database Management: PostgreSQL, MySQL, Databricks, MongoDB, Supabase
Tools + Cloud: Docker, Git, Linux, AWS, VS Code/Studio, Chrome Extensions, n8n
